---

Hi all,

In this morning's meeting with Randy and the rest of the Nat'l Monument review team, we (PPA) agreed to set up a google drive folder to facilitate agencies' sharing data, documents, and information with us. That is the [National Monuments Review Data Call folder](#) that I have shared. Keep in mind that this is shared with everyone on the team (not just PPA).

So that we don't need to keep track of two different Drive folders, I created a "PPA" folder within this National Monuments Review Data Call folder. This particular folder has been unshared with everyone except the PPA econ team, and is for our own internal documents and analyses. I have placed a copy of the Weiler & Seidl paper that Sarah shared in there, as well as the template that was created and shared today.

Any documents related to Bears Ears and Grand Staircase-Escalante that were in the National Monuments folder, I have now put in their respective folders in the National Monuments Review Data Call folder. I have also added to those folders the RMP for what is now Bears Ears (formerly "Monticello"), as well as the 1999 management plan for Grand Staircase-Escalante (I have not yet found an updated plan, if there is one - it looks like there was a plan evaluation in 2015).

Hope this isn't confusing but let me know if you have questions.

Ann
